

AMBPS –Entrance exams

Our entrance assessment exam to enter grade 1-7 took place on 7th & 13th September at the Al Muntazir Boys Primary School. This assessment applies a common standard for all applicants. The main objective of having the assessment is to provide a common yardstick to measure the potential of all candidates who come from diverse backgrounds.

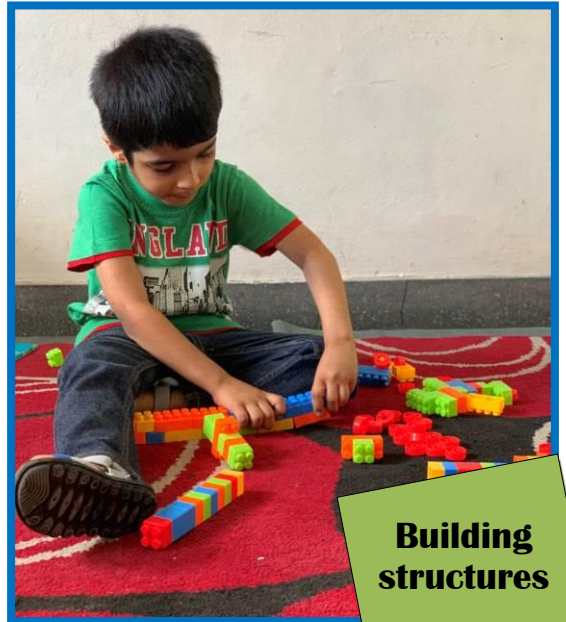

The students spent half of their day in the class which allowed them to get a feel of the school's environment. During this child-friendly evaluation, children got the opportunity to make new friends, play out and work in a less pressured environment. Besides a written assessment for English and Mathematics, students were also involved in different activities where our team of teachers assessed their social, emotional, and cognitive skills.
